

# POSITIVE DISPLACEMENT METERS

FOR ACCURATE MEASUREMENT OF VALUABLE FUELS AND LIQUIDS

**LIQUID CONTROLS®**  
When Accuracy Counts®

# THE ORIGINAL TRI-ROTOR METER

PROVEN THE MOST TRUSTED AND RELIABLE METER SINCE 1956

The original Liquid Controls tri-rotor meter design consists of a housing in which three rotors turn and measure fuel in synchronized relationship with no metal-to-metal contact.

The bladed displacement rotors alternately rotate through the half-cylinder bores of the meter element, while the single blocking rotor rotates within its bore to produce a continuous capillary seal between the unmeasured product and the metered product.

Because the force exerted by the fluid flowing through the meter is at right angles to the faces of the displacement rotors, and the rotor shafts are always in a horizontal plane, there is no axial thrust, thereby eliminating wear between the rotors and the bearing plates and ultimately providing a lifetime of measurement accuracy!

**LOW PRESSURE DROP**  
~2.3 PSI

\*avg. based on flowrate

**WIDE RANGE TEMP**

-40° TO 160°

(-40° to 71°C)

**FULL FLOW RANGE**

6 -1000 GPM

(20 to 3780 LPM)

## INDUSTRIAL APPLICATIONS

SUGARS, SYRUPS, WATERS, SOLVENTS, ACIDS, AND HIGH VISCOSITY OILS

### CLASS 3

Liquid Sweeteners and Syrups, Dextrose, Fructose, Sucrose, Maltose, Lactose. Corn Oil, Soy Bean, Cotton Seed and Coconut Oils, Shortenings

M-7 class 3 meter with mechanical register

### CLASS 4

Potted, treated, deionized, and demineralized Water, Windshield Washer Fluid and Solvents where no red metals are allowed

M-5 class 4 meter with register and printer

### CLASS 8

Acidic pH Liquids, Nitric, Phosphoric and Glacial Acetic Acids, Fruit Juices and Vinegar, Distilled Water

M-7 class 8 stainless steel meter with register

### CLASS 14

Crude Oil, LACT, NOD, Heated and/or Viscous Liquids Including: Animal Fats, Resins, #6 Oil, Non-Abrasive Asphalt Emulsions

M-30 class 14 meter with POD for LCR.iQ

MSAA-75 class 14 meter with mechanical register

### **MOST SUSTAINABLE ACCURACY!** (COMPARED TO CONVENTIONAL METERS)

Zero wear and no metal-to-metal contact inside the measuring chamber results in maximum accuracy retention over time, fewer re-calibrations, and longer service life.

# RANGE & SPECIFICATIONS

LC METERS MEET NTEP (NIST HANDBOOK 44), MEASUREMENT CANADA, OIML, AND MILITARY WEIGHTS AND MEASURES SPECIFICATIONS.

M-Series	Size	Flange Size	Nominal Flow Rate Range		Maximum Pressure		
		Inches	GPM	LPM	PSI	BAR	kPa

MSAA-120	6	100-1000	378-3785	285	19.7	1965	

Stated accuracy obtainable when all variables remain constant. Reading/measurements reflect a minimum of one minute of flow at selected rate(s). All accuracy statements based on metering safety solvent (aliphatic hydrocarbon), approximate viscosity 1 CPS. On higher viscosity products, the average deviation in accuracy will be less.

\*M-40 AVI is for aviation applications only, model name M-40-2AVI.

# REFINED and ALTERNATIVE FUELS

## TRUCK MOUNTED FUEL DELIVERY SYSTEMS

- Liquid Controls M-Series™ class 1 and class 16 meters provide the industry's most time-proven record of superior accuracy, performance, and long-term durability in custody transfer of refined and alternative fuels.
- M-5®, M-7®, and M-10® meters are ideal for applications with high accuracy, wide flow range, or low-flow requirements.
- Examples include truck based applications that deliver gasoline and diesel fuels or retail On-Demand Fueling applications.

### M-5®, M-7®, M-10®

#### REFINED FUELS TRUCK METERS

M-7® class 1 meter system for refined fuels with LCR.iQ®, E-7 valve, optical air eliminator and high-capacity strainer.

Model Shown: M7K1-LCR.iQ-I#3

#### CLASS 1

Refined Petroleum Products, Leaded and Unleaded Gasoline, Fuel Oils, Diesel Fuel, Kerosene, Ethylene Glycol, Propylene Glycol at rated capacity. Also used on Motor Oils, Crop Oils and Rotogravure Ink at reduced flow rates.

#### CLASS 16

General Solvent, Methanol, Xylene, Naptha, Acetone, MEK, MIBK, and Alcohols (including 200 proof ethanol)

## REGISTRATION

# LCR.iQ®

LCR.iQ® is the industry's newest and most advanced electronic register, designed to simplify fueling operations with process configurability, intuitive operation, and real-time fueling diagnostics and data connectivity to maximize up-time and daily throughput.

# LPG and NH<sub>3</sub>

## BOBTAIL MOUNTED DELIVERY SYSTEMS

- The MA<sup>®</sup> and MSA series class 10 meters are the industry standard for safe and accurate transfer of LPG fuels
- MA<sup>®</sup> series class 12 meters are the industry standard for safe and accurate delivery of anhydrous ammonia (NH<sub>3</sub>).

### MA-7<sup>®</sup>

LPG BOBTAIL METER SYSTEMS

MA-7<sup>®</sup> class 10 system for LPG applications including LCR.iQ<sup>®</sup> register, strainer, optical air eliminator and 2-Stage preset valve.

Model Shown: MA7KY10-LCR.IQ-I#1

#### CLASS 10

Liquified Petroleum Gas [LPG], Including: Butane, Isobutane, Pentane, Ethane, Freons, and Propane

#### CLASS 12

Anhydrous Ammonia (NH<sub>3</sub>)

LCR-II is the industry's work-horse in fueling registration.

ETVC - Temperature Volume Compensation provides accurate net-volume deliveries.

The Corken<sup>®</sup> Z3200 3" for LPG Bobtail Applications

# BULK PLANT & LOADING

## BULK PLANT AND LOADING TERMINAL METERS

- The larger M, MSA & MSAA series meters are ideal for bulk measurement during loading and unloading of tanks, railcars, ships, and barges.
- MSA & MSAA series meters have a spherical steel case for higher system pressure applications to handle nearly any bulk metering requirement.
- Meter accessories include bulk air/vapor eliminators, strainers, valves, and mechanical or electronic registers.
- MSA & MSAA series meters feature the same high-quality meter elements and accuracy that are the hallmark of all LC PD meters and have flow rates up to 1,000 gpm.

## M, MSA, and MSAA Series

M-30<sup>®</sup> with LCR.iQ<sup>®</sup> electronic register

Toptech<sup>®</sup> MultiLoad II and SMP preset controllers for terminals

# AVIATION FUELING

TRUCK MOUNTED REFUELERS AND HYDRANT DELIVERY SYSTEMS

## CLASS 2

Aviation Fuels including Jet A, Jet A-1, JP-8, and Avgas

- Liquid Controls M-Series meters for Class 2 Aviation fueling applications began in 1956 with the US Air Force and continues today to be the preferred meter for aviation fueling.
- Meter sizes from M-5<sup>®</sup>, M-7<sup>®</sup>, M-10<sup>®</sup>, M-25<sup>®</sup>, M-30<sup>®</sup>, M-40<sup>®</sup>, M-60<sup>®</sup>, M-80<sup>®</sup> cover the full range of aviation fueling applications up to 1000 gpm flow rate.
- LCR.iQ<sup>®</sup> provides an easy to use, intuitive operator interface and ties together critical sensing devices in aviation fueling systems, reducing complexity, improving efficiency and maintains all fueling system data.

## M and MSAA Series

### Slipstream<sup>®</sup> Densitometers

Real-time fuel density provides the most precise fuel deliveries preset and reported by weight

*\* preset by weight patent pending*

### Water Detection

Real-time fuel monitoring utilizing approved water detection devices per JIG, A4A, IATA, and EI1598

### Differential Pressure (dP) Transducers

Real-time dP input allows active monitoring of dP changes during fueling for improved safety

### Temperature-Volume Compensation

Real-time fuel temperature compensation provides net-volume deliveries

### LCR.iQ<sup>®</sup>

- Easy configurability
- Hi-Resolution display
- Wireless control capability

ATEX Div. 2, Zone 2 rated

### MASTERLOADx.iQ<sup>™</sup>

- All features of LCR.iQ
- Plus: expanded I/O
- Plus: Zone 1 enclosure

ATEX Zone 1 rated

At the center of the new CENTRILOGIQ® platform is the LCR.iQ®, built from the ground up by Liquid Controls' Research & Development team with close collaboration with customers who benefit from it!

### HIGH-RES. DISPLAY WITH DAY/NIGHT MODES

7" ultra bright video display designed for extreme climates and rigorous fueling environments.

### LARGE SCALABLE DIGITS FOR EASY VIEWING

Large digits provide easy viewing, day or night, up to 100 feet (30 m) away.

### CONFIGURABLE FUELING DATA

The LCR.iQ® allows users complete control over the fueling data fields displayed on the detailed delivery screen.

### SMART KEYS FOR GUIDED OPERATION

Smart keys guide the operator through the next available steps in the operation to minimize risk of error.

### LARGE KEYS FOR EASY OPERATION

Large, petroleum and UV resistant elastomeric keys provide confident feel and consistent operation.

### METER MOUNT BASE

Liquid Controls standard meter-mount base with integrated pulser allows easy mount-and-connect retrofit. (panel mount option also available)

## LCR.iQ® User Configurable Features

### User Configuration Features

- Configurable idle screen** - Display exactly the data on the fueling screen the way you want it.
- Configurable fuel delivery process** - Step by step on-screen instructions guide the operator through the fueling process you specify.
- Configurable date, time, and units of measure formats** - Set local units of measure and date/time formats to eliminate unit conversions
- Configurable product types** - Configure product types and terms based on local terminology
- Configurable flow rate min/max thresholds** - Set alerts to notify user if flow rates exceed thresholds
- Configurable I/O settings** - Define what each input and output is assigned to and how they are utilized
- Configurable tickets and printer settings** - Easily tailor ticket header text, fields, and printer type
- Configurable product pricing and taxes** - Either fixed or user definable pricing and taxes at the delivery level
- Configurable data logging and retention period** - Define how long to retain fueling transactional data on-board the LCR.iQ®
- Configurable electronic temperature volume compensation** - Available with optional temperature probe and thermowell kit

### Data Management, Setup, Calibration and Security

- Wireless data and remote controls** - Bluetooth / Wi-Fi accessibility for data transfer and remote control applications designed for use with LCR.iQ
- Ethernet connectivity** - Data transfer via ethernet connection to systems configured with FTP support or LCP communication protocol
- Wi-Fi access point connectivity** - Connect to local SSID Wi-Fi access point to push fueling data to a remote network
- LCR.iQ settings and preferences transferable to multiple registers** - Set up once, then backup and install configuration across multiple units
- Intuitive Calibration** - Easy to follow meter calibration and linearization process.
- Security** - Set security access for operators and supervisors
