

SEMLER

Semler Mission

For more than 100 years, the overriding mission of Semler Industries has been to deliver complete customer satisfaction.

Thinking first of the customer allows Semler to produce liquid handling and fluid purification solutions designed specifically for any need using only the highest quality materials and manufacturing standards. This constant commitment to excellence makes Semler the only choice in liquid handling and fluid purification.

Drum Filling Systems

Semler Industries has engineered and manufactured Drum Filling Systems for the chemical and coating industries for more than 30 years. While maintaining our standards for quality engineering and construction, we offer an economical solution for applications that require intermittent usage.

We offer four stationary models to meet your specific application requirements, each designed to fill multiple sized containers from 5 to 55 gallons, as well as tote tanks. For more information on Semler Drum Filling Systems, contact one of our Liquid Handling Product Specialists.

Standard Features

- Pneumatic operation for greater safety
- Easily interfaced with scales (mechanical or electronic)
- Reliable semi-automatic operation
- Dead-man foot control and hand protection guard are included
- Wetted parts constructed with 304 stainless steel and Teflon
- Accurate precision filling each time eliminates under and over loaded drums
- Explosion proof construction for use in hazardous environments
- Contain inadvertent spills with our special drip containment

Available Options

- Filler pump sets
- 316 stainless steel
- Electrical two-stage shut-off control valve allowing for two speed filling
- Final filtration packages
- Customized systems

Available Models

- Single Drum Surface Fill
- Single Drum Sub-Surface Fill
- Multi-Drum Surface Fill
- Multi-Drum Sub-Surface Fill

Did you know about other skills we have in handling solutions from our...
